DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities:

Claim 1, line 4, "an" (aging) change to - - the - -.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Gu (USP. 6,525,683).

Regarding claim 1, Gu disclose an aging circuit for an organic electro luminescence device comprising:

- a plurality of pixels arranged in a matrix at intersection areas of row lines and column lines (Fig. 1A);
- the aging circuit (82) having at least one aging AC voltage source (Col. 4, Line 27) in order to apply a specific aging AC voltage pulse to the pixels (Col. 4, Line 14 & 37).

Regarding claim 14, Gu disclose a driving method of an aging circuit for an organic electro luminescence device comprising;

- applying a plurality of aging AC voltages to the pixels (Col. 1, Line 52), the aging

Art Unit: 2821

AC voltage is applied in an AC voltage pulse (Col. 3, Line 29); and

- causing an electro luminescence cell within the pixel to emit light by aging AC voltage (Col. 3, Line 46) in accordance with a current corresponding to a current path formed (Col. 3, Line 50 & 55).

Allowable Subject Matter

4. Claims 2-13 and 15-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter:

The reference of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in the claims: a capacitor connected between the first and second switch devices, wherein a cathode terminal of the electro luminescence cell is connected to a cell support voltage source of a positive voltage and include the driving method of a different voltage between a cell support voltage source and a cell drive voltage source corresponding to the current path.

Citation of relevant prior art

Prior art Oomura (USP. 6,693,388) disclose active matrix display.

Prior art Gu (US. 2003/0052904) disclose nonlinear mapping video data to pixel.
